1A

```matlab
function [E] = bin_mean(n,p,N)
E=0;
for x=1:N
        if n>=x
            b = bin_coeff(n,x);
            f = b*p^(x)*(1-p)^(n-x);
            E = E + x*f;
        end
end
end
```

Not enough input arguments.

Error in bin_mean (line 4)
for x=1:N
